KEY TO RX PRODUCT LISTINGS

How to Find an Rx Product

The layout of *Red Book* product listings allows for easier identification of Rx products, manufacturer names, generic cross-references, HCFA Federal Upper Limit prices for Medicaid reimbursement, and repackagers of pharmaceutical products. Products are listed alphabetically by their prevailing names, as explained below. (For information on how to locate and interpret OTC and non-drug product listings, refer to section 8.)

Product quantities now appear in National Council for Prescription Drug Programs (NCPDP) standard billing units (e.g., ea, ml, gm). Please see Section 4, "Drug Reimbursement Information," for an explanation of the NCPDP standard. A conversion table can be found in Section 2, "Clinical Reference Guide."

Trademarked Name: Detailed product information is available under the actual brand name rather than the generic name; i.e., "Valium" product information is listed under "Valium" rather than under diazepam. However, you will find a cross-reference under Roche, the manufacturer of Valium, in the diazepam listing.

VALIUM (Roche Prod)
diazepam
TAB, PO, 10 mg.
100s ea, C-IV 00140-0005-01 108.92 AB

Generic Name: In-depth product information on generic products can be found by locating the generic product name, under which the various manufacturers, suppliers, or distributors are listed alphabetically; i.e., diazepam features several dozen generic manufacturers. Manufacturers listed under their trademarked product name feature a cross-reference to that name.

DIAZEPAM
HCFA
TAB, PO, 2 mg, 100s ea 2.09
(Abbott Hosp)
INJ, 13 (AMP)
5 mg/ml
2 ml 10s, C-IV 00074-3210-01 86.69 AP
(Roche Prod) See VALIUM

Single-ingredient generic names are spelled out in full. Multi-ingredient products (two or more) are listed in the alphabetical order of their ingredients using the standard abbreviations listed on the following pages.

Drug Class Symbols

The following descriptive symbols indicate a product's status under the Controlled Substances Act of 1970. They apply to all entries under the product name or dosage form in which they appear. Use these symbols only as a guide. Check the manufacturer's label for definitive information.

- C-II** High Potential for Abuse. Prescriptions must be written in ink or typewritten and signed by the practitioner. Verbal prescriptions must be confirmed in writing within 72 hours and may be given only in a genuine emergency. No renewals.
- C-III** Some Potential for Abuse. Prescriptions may be oral or written. Up to 5 renewals are permitted within 6 months.
- C-IV** Low Potential for Abuse. Prescriptions may be oral or written. Up to 5 renewals are permitted within 6 months.
- C-V** Subject to State and Local Regulation. Abuse potential is low; a prescription may not be required.
- Rx** Prescription only, not a controlled substance.

How to Read the Listings

The first line of an entry features the product or generic name. HCFA Federal Upper Limit price information is provided for all applicable multi-source product categories. The **HCFA** symbol can be found immediately following the generic product name. A complete listing of Federal Upper Limit prices appears in Section 2 (Third Party/Government Information).

Manufacturers are listed alphabetically within generic listings. Repackagers of products feature the **REPACK** symbol next to their names. For trade name listings, generic cross-references appear in lower case on the following line.

A three-letter abbreviation indicates the form of the drug; i.e., CAP indicates capsules, TAB indicates tablets, etc. For a key to additional abbreviations, refer to the table on the following page.

Route of administration, product descriptive information, strength, quantity, and drug class symbol (where applicable) appear next, followed by National Drug Code (NDC) number. The Average Wholesale Price (AWP), Direct Price (DP), and the Orange Book Code (OBC) complete the entry for each product. For more information on Orange Book Codes, refer to the next page.

Drug Class Symbol	NDC (National Drug Code)	DP (Direct Price)
PRODUCT NAME (Manuf) generic cross-reference		
TAB, PO, 100 mg, 100s ea, C-V	00839-7713-06	9.79 7.25 AB
1000s ea, C-V	00839-7713-16	92.86 89.50 AB
300 mg 100s ea, C-V	00839-7714-08	23.69 17.55 AB
Route of Administration	Strength	Quantity
		AWP (Average Wholesale Price)
Form		CBC (Orange Book Code)

All prices are current as of the date *Red Book* went to press. However, actual prices paid by retailers may vary, and all prices are subject to change without notice. The prices shown here are based on data obtained from manufacturers, distributors, and other suppliers. While great care has been exercised in compiling this information, the publisher of *Red Book* does not warrant its accuracy. Information may be supplemented by subscribing to the monthly *Red Book UPDATE*, *ReadyPrice™*, *Red Book for Windows™*, *Red Book* database services, or by obtaining prices published in catalogs or other printed materials disseminated by manufacturers or distributors.

ROUTE OF ADMINISTRATION ABBREVIATIONS

Route of Administration (ROA) refers to the intake or application method of a product. The following abbreviations are used to indicate the ROA:

BC.....Buccal	OP.....Ophthalmic
IH.....Inhalation	OT.....Otic
IJ.....Injection	PO.....Oral
IP.....Implantation	RC.....Rectal
IR.....Irrigation	SL.....Sublingual
MM.....Mucous	TD.....Transdermal
Membrane	TP.....Topical
NS.....Nasal	UR.....Urethral
	VG.....Vaginal
